

Fisnar Introduces Free Trial Service

FOR IMMEDIATE RELEASE

WAYNE, NJ – August, 2011 – Fisnar[®] Inc., is pleased to announce their newest business development, [Free Video Trials](#). Fisnar[®] Inc. is a leader in fluid dispensing and dispensing automation systems, offering application solutions for adhesives, glue, cyanoacrylates, silicone, RTV, anaerobic resin, epoxy, UV cure formulations and more.

Fisnar[®]'s new service provides an opportunity for customers to program and confirm an automated dispensing application without having to purchase equipment or allocate engineering time to assure the investment. Fisnar[®]'s Engineers will help select the right robot for customer applications and provide integration advice with this completely FREE service. Only shipping costs will be charged to the customer's account.

Details on the program can be found on the Fisnar web site. Interested clients can simply send in a sample of the job that is to be completed, a sample of a satisfactory or best-effort completed part, and a sample of the fluid, paste, etc. to be dispensed. An MSDS accompanying the fluid is required, along with an electronic copy of the MSDS and TDS forwarded to Fisnar engineering.

Upon receipt, the job will be programmed and a video prepared with a narration of the trial. The finished parts will be returned for inspection, along with the narrated DVD, providing specific detail on how the recommended Fisnar[®] automated dispensing system will be valuable for the job. This new program offers a flexible, certain, and cost-conscious approach to choosing automated dispensing systems.
